PROJECTS

Personal Website | *React, Chakra.UI, Java, PostgreSQL*

Github | [Link](#)

- Utilised **React** and **Chakra.UI** to create a Single Page Application personal website.
- Handled server requests and routes using vanilla **Java**.
- Served database queries and retrieval with **PostgreSQL**.

Pet Adoption Website | *Node.js, Express.js, JavaScript, MySQL*

Github

- Developed an animal adoption site to allow users to register and simulate the animal adoption process.
- Utilised **Node.js** and **Express.js** to develop a dynamic website.
- Integrated **MySQL** to interact with dynamic web interfaces.

Library Web Scraper | *Python, Flask, Selenium, JavaScript*

Github

- Implemented **Selenium WebDriver** using **Python** to retrieve details of a book's current status and expected return date.
- Developed a static website using **HTML**, **CSS** and **JavaScript** to display and execute the script.
- Incorporated **Flask** framework to managed the server-sided routes and overall backend of the website

Tower Defence Game | *C++, SFML*

Github

- Developed a Tower Defence game in **C++**, with **SFML** to serve as a graphics interface.
- Successfully implemented Object Orientated Programming principles in the development of the project.
- Collaborated in a group of 3, and used **Git's** functionality to deliver the project.

EXPERIENCE

Nightfill/Replenishment

Coles

Jun 2021 – Present

Adelaide, South Australia

- Developed exceptional teamwork and communication skills.
- Ensured that inventories and item location are correct in accordance with established procedures.
- Provided quality customer service to the customers through the grocery department.

Crew Trainer

McDonald's

May 2018 – Jul 2021

Adelaide, South Australia

- Assisted management in training new crew members and took a lead role in crew member development.
- Identified barriers on shift and proactively communicated this to shift managers.
